Let us Learn

THB

Introduce 'ascending order' as arranging numbers from the smallest to the greatest.
Introduce 'descending order' as arranging numbers from the greatest to the smallest.

THB

Call four children and ask them to pick any four number cards placed upside down in a circle. First, compare the numbers in the tens place to identify the greater number. If the numbers in the tens place are the same, compare the numbers in the ones place. Then, ask the children to stand in order from the smallest number to the greatest number to introduce ascending order. Next, ask them to stand in order from the greatest number to the smallest number to introduce descending order

Let us Practise

Write the given numbers in the ascending order.

26, 71, 73, 56, 33

29, 82, 23, 76, 27

23, 35, 21, 12, 28
