Air

Do and Observe

How does sound reach you?

1. Ask your friend to clap from one corner of the classroom. Can you hear the clap?

Air moves things.

Air carries sounds.

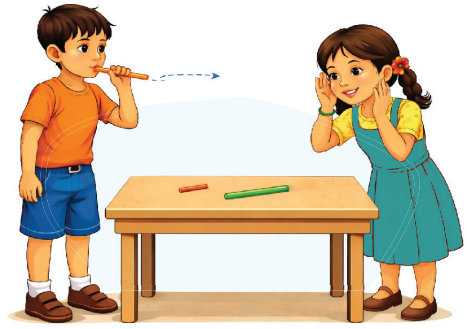

Air spreads smells.

What will happen if there is no air around us?

2. Listen to the sound.

- Take two straws of different lengths (long and short).
- Hold one straw and blow air through it to make a sound.
- Now blow through the other straw.
- Listen to the sound from each straw.

Straw	Loud sound (✓/×)	Soft sound (✓/×)
Long		
Short
